Project Title

BUS-MANAGEMENT-AND-ONLINE-TICKET-BOOKING-SYSYSTEM

Short Description

The Bus Management and Online Ticket Booking System is a web-based application designed to manage buses, routes, trips, seat bookings, and payments. It connects passengers, bus drivers, admins, and maintenance managers on a single platform to make bus scheduling, ticketing, and fleet maintenance faster, safer, and easier.

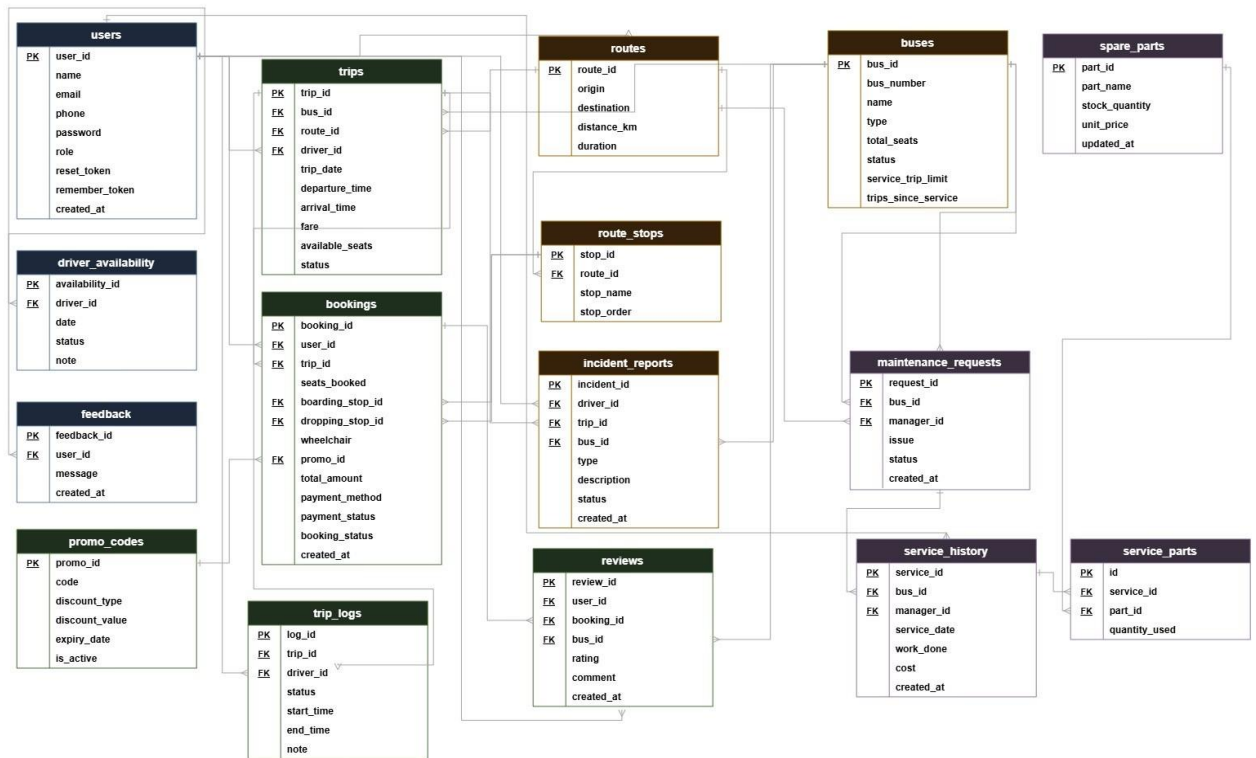

Introduction

The Bus Management and Online Ticket Booking System is a computerized system that handles the daily operations of a bus service. Passengers can search trips, view routes, book seats, and pay online or at the counter, while drivers manage their assigned trips, availability, and incident reports. Admins schedule trips and manage buses, routes, and promotions, and maintenance managers track servicing and spare parts. The system replaces slow manual booking and paper-based record keeping with one role-based online platform.

Background Study

Traditional bus counters rely on manual ticketing and paper-based records, which often lead to double-booking, long queues, lost information, and delayed bus servicing. Passengers usually have no easy way to compare trips, and managers have no reliable way to know when a bus is due for maintenance. A computerized management system solves these problems by storing all data securely in one database, automating seat availability, generating revenue and maintenance reports, and alerting managers about service-due buses and low spare-part stock. This improves reliability, reduces errors, and saves time for both passengers and staff.

Types of Users and Features

Types of Users: 1. Passenger 2. Bus Driver 3. Admin 4. Maintenance Manager

COMMON FEATURES (AVAILABLE TO ALL USERS)

Authentication

- Login to the system
- Logout from the system
- User registration

Account Management

- Change or reset password (Forgot Password)
- Manage profile information (view, edit, delete)

Dashboard

- Access a personalized, role-based dashboard after login

Specific Features by User Type

PASSENGER

Core / CRUD Modules

- Booking — book a seat, modify booking, cancel booking, view tickets & history
- Profile — view, edit, and delete account
- Review — add, edit, and delete reviews on trips

Unique Features

- Bus Company Rating — view aggregated ratings of buses / operators
- Wheelchair Special Request — request wheelchair support during booking
- Payment System (COD / Counter)

BUS DRIVER

Core / CRUD Modules

- Trip Log — start and complete assigned trips
- Availability — set available / off-day schedule
- Incident Report — report incidents or damage

Unique Features

- Incident Report — full CRUD on incident / damage reports
- Passenger Verify — verify passenger ticket code at boarding
- Route View — view assigned trip route and all stops

ADMIN

Core / CRUD Modules

- Bus — manage buses (add, edit, delete, search)
- Route & Schedule — manage routes, stops, and schedules
- Trip — schedule trips (bus + route + driver + time + fare)
- Promo Code — manage discount / promo codes

Unique Features

- Revenue Report — total paid revenue with date-wise breakdown & chart
- Feedback — view all user feedback
- Damage Report — review and resolve reported bus damage

MAINTENANCE MANAGER

Core / CRUD Modules

- Maintenance Request — create and track maintenance requests
- Service History — record servicing and parts used
- Spare Parts — manage spare-part stock

Unique Features

- Service-Due Alert (Trip Limit) — auto list buses that crossed the service trip limit
- Low Spare-Part Stock Alert — warn when a part's stock is low
- Maintenance Cost Report — total maintenance cost (service + parts)
